WORK EXPERIENCES

System Automation Test Engineer | *Accenture Federal Services* | 2025 – Present

- Support PeopleSoft modernization through manual and automated testing, creating SQL-based test scripts, validating acceptance criteria, and identifying defects early in the development cycle.
- Lead a three-person automation team in refactoring Playwright, Cucumber, and TypeScript regression suites to improve scalability and expand coverage for critical workflows.
- Design and execute test plans for PeopleSoft's first generative AI capability, validating model inputs, outputs, and UI behavior to support a record-time deployment without critical defects.
- Identify and resolve data integrity and security gaps impacting sensitive PII, strengthening backend validation and preventing recurring production defects.

Software Automation Engineer | *Infosys Limited* | 2022 – 2023

- Developed and maintained automated test frameworks using Selenium, JUnit 5, and Python to expand regression and integration test coverage.
- Refactored a Java REST API test framework by eliminating redundant API calls, improving execution performance by 20%
- Validated REST endpoints and backend data integrity using SQL and Postman to ensure consistent data across services.
- Collaborated with Agile teams to document and resolve defects in Jira while supporting CI/CD pipelines with Jenkins.

Java Full-Stack Automation Engineer | *Revature* | 2021 – 2022

- Built full-stack applications using Java, Spring Boot, PostgreSQL, and AWS within Agile CI/CD environments supported by Git, Jenkins, and Jira.
- Developed full-stack applications using Java, Spring Boot, PostgreSQL, and AWS within Agile CI/CD environments.
- Designed RESTful services and implemented business logic using Spring Boot and Hibernate.
- Built responsive user interfaces using Angular, TypeScript, JavaScript, HTML, and CSS.
- Integrated automated functional and end-to-end testing using Selenium, Cucumber, JUnit 5, and Mockito.

PERSONAL PROJECTS

Fortune Hangman | *Personal* | github.com/DanayaPie/FortuneHangman | 2023

- Developed a REST API using Java, Spring Boot, and Hibernate with 98% unit and integration test coverage.
- Built a CLI-based multiplayer game engine with randomized gameplay, a scoring system, and data serialization
- Implemented an H2 in-memory database to support isolated testing environments.

SKILLS & TECHNOLOGIES

Programming Languages:	Java (OOP), Python, SQL, TypeScript, JavaScript
Testing & Automation:	Playwright, Selenium, Cucumber, JUnit 5, Mockito, SQL Test Scripts, GenAI Validation, Test Plan Creation
Frameworks & Libraries:	Spring Boot (IoC), Hibernate (ORM)
Enterprise Platforms:	PeopleSoft, SuccessFactors, Taleo
DevOps & Tools:	Git, Jenkins, Git, Jira, Maven, DBeaver, Lucidchart, Draw.io
Data & Cloud:	PostgreSQL, H2, MongoDB, AWS

CERTIFICATIONS & EDUCATION

- **Certified SAFe 6 Agile Software Engineer** | Cert ID: 64374498-2247 | 2026
- **ISTQB Certified Tester Foundation Level (CTFL)** | Cert ID: 26-CTFL-01648-USA | 2026
- **B.S. in Forensic Science** | *George Mason University* | GPA: 3.91/4.00 (Summa Cum Laude and Dean's List)
